

Model COVID-19 Pre-Event Medical Screening Checklist

Use this checklist to assist in identifying potential COVID-19 cases before event participation. This may be shared with Scouting families to guide their choices to attend Scouting activities.

Units should review these questions with each youth and adult participants upon arrival at local events or meetings and before departure for out-of-town events. District and Council event staff should review these questions with event staff and individual participants who have not been screened by a unit before their arrival.

This checklist has been customized locally, as specified by the Boy Scouts of America.

1. Are you currently experiencing symptoms of COVID-19, such as fever, cough, or shortness of breath?
2. Have you been in close contact with anyone known or suspected to have COVID-19, including members of your household? This includes anyone waiting for the results of a COVID-19 test.
3. In the past 14 days, have you traveled to another state or country, except as permitted by current New Jersey COVID-19 Executive Orders?
